SUBJECT INDEX

Aerospace engineering
Probabilistic Methods for Aerospace Engineering, Sankaran Mahadevan, AS Oct. 01, p119.

Aerospace transport
Space Transfer-Vehicle Concept for Deploying Solar-Power Satellites, David W. Way and John R. Olds, AS Apr. 01, p65-71.

Aircraft
Stochastic Field Models for Aircraft Jet Engine Applications, Dan M. Ghiocel, AS Oct. 01, p127-139.

Aluminum
Mechanistic Model to Predict Statistical Scatter in Fatigue Response of Titanium Aluminide, Robert G. Tryon and Animesh Dey, AS Oct. 01, p120-126.

Assessments
Space Solar Power: An Assessment of Challenges and Progress, John C. Mankins, AS Apr. 01, p46-51.

Technical Assessment of Space Solar Power Research Program, Jerry Grey, AS Apr. 01, p52-58.

Axial compression
Elastic Buckling of Multilayered Anisotropic Conical Shells, Chih-Ping Wu and Chih-Wei Chen, AS Jan. 01, p29-36.

Influence of Fiber Undulations on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p12-20.

Influence of Residual Strains on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p21-28.

Bars
Circular Bars under Distributed Torques, James T. S. Wang, AS Jan. 01, p1-5.

Buckling
Buckling of Skew Plates with Continuity or Rotational Edge Restraint, P. Huyton and C. B. York, AS July 01, p92-101.

Elastic Buckling of Multilayered Anisotropic Conical Shells, Chih-Ping Wu and Chih-Wei Chen, AS Jan. 01, p29-36.

Influence of Fiber Undulations on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p12-20.

Influence of Residual Strains on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p21-28.

Cantilevers
Nonclassical Stability Problems: Instability of Slender Tubes under Pressure, Anthony N. Kounadis, AS Jan. 01, p6-11.

Composite materials
Design of Composite Surrogate Mirror Support Structure, Arup Maji, Brian Kozola and Steve Griffin, AS July 01, p112-118.

Composite structures
Design of Composite Surrogate Mirror Support Structure, Arup Maji, Brian Kozola and Steve Griffin, AS July 01, p112-118.

Reliability Analysis of Rotorcraft Composite Structures, S. Mahadevan, A. Dey, R. Tryon, Y. Wang and C. Rousseau, AS Oct. 01, p140-146.

Computer models
Mechanistic Model to Predict Statistical Scatter in Fatigue Response of Titanium Aluminide, Robert G. Tryon and Animesh Dey, AS Oct. 01, p120-126.

Conical bodies
Elastic Buckling of Multilayered Anisotropic Conical Shells, Chih-Ping Wu and Chih-Wei Chen, AS Jan. 01, p29-36.

Critical load
Nonclassical Stability Problems: Instability of Slender Tubes under Pressure, Anthony N. Kounadis, AS Jan. 01, p6-11.

Cylindrical shells
Influence of Fiber Undulations on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p12-20.

Influence of Residual Strains on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p21-28.

Damage
Contour Dust Shield Performance, Roberto A. Osegueda, Cesar J. Carrasco, Miguel Orozco, John Eftis, Edward Reynolds and Ted G. Sholar, AS Oct. 01, p147-157.

Dynamic stability
Nonclassical Stability Problems: Instability of Slender Tubes under Pressure, Anthony N. Kounadis, AS Jan. 01, p6-11.

Earthmoving
Review of Resistive Force Models for Earthmoving Processes, Stéphane Blouin, Ahmad Hemami and Mike Lipsett, AS July 01, p102-111.

Edge effect
Buckling of Skew Plates with Continuity or Rotational Edge Restraint, P. Huyton and C. B. York, AS July 01, p92-101.

Elastic deformation
Nonclassical Stability Problems: Instability of Slender Tubes under Pressure, Anthony N. Kounadis, AS Jan. 01, p6-11.

Elasticity
Elastic Buckling of Multilayered Anisotropic Conical Shells, Chih-Ping Wu and Chih-Wei Chen, AS Jan. 01, p29-36.

Electric power transmission
Space Solar Power: An Assessment of Challenges and Progress, John C. Mankins, AS Apr. 01, p46-51.

Space Solar Power: Environmental Questions and Future Studies, G. Pignolet, A. Celeste, M. Deckard and J. P. Esperet, AS Apr. 01, p72-76.

Technical Assessment of Space Solar Power Research Program, Jerry Grey, AS Apr. 01, p52-58.

Energy sources
Robotic Assembly of Space Solar Power Facilities, William Whittaker, Peter Staritz, Rob Ambrose, Brett Kennedy, Stephen Fredrickson, Joe Parrish and Chris Urmson, AS Apr. 01, p59-64.

Space Solar Power: An Assessment of Challenges and Progress, John C. Mankins, AS Apr. 01, p46-51.

Technical Assessment of Space Solar Power Research Program, Jerry Grey, AS Apr. 01, p52-58.

Engines
Stochastic Field Models for Aircraft Jet Engine Applications, Dan M. Ghiocel, AS Oct. 01, p127-139.

Environmental issues
Space Solar Power: Environmental Questions and Future Studies, G. Pignolet, A. Celeste, M. Deckard and J. P. Esperet, AS Apr. 01, p72-76.

Excavation
Review of Resistive Force Models for Earthmoving Processes, Stéphane Blouin, Ahmad Hemami and Mike Lipsett, AS July 01, p102-111.

Facilities
Robotic Assembly of Space Solar Power Facilities, William Whittaker, Peter Staritz, Rob Ambrose, Brett Kennedy, Stephen Fredrickson, Joe Parrish and Chris Urmson, AS Apr. 01, p59-64.

Fatigue
Mechanistic Model to Predict Statistical Scatter in Fatigue Response of Titanium Aluminide, Robert G. Tryon and Animesh Dey, AS Oct. 01, p120-126.

Reliability Analysis of Rotorcraft Composite Structures, S. Mahadevan, A. Dey, R. Tryon, Y. Wang and C. Rousseau, AS Oct. 01, p140-146.

Filament wound materials
Influence of Fiber Undulations on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p12-20.

Influence of Residual Strains on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p21-28.

Finite element method
Design of Composite Surrogate Mirror Support Structure, Arup Maji, Brian Kozola and Steve Griffin, AS July 01, p112-118.

Reliability Analysis of Rotorcraft Composite Structures, S. Mahadevan, A. Dey, R. Tryon, Y. Wang and C. Rousseau, AS Oct. 01, p140-146.

Manufacturing
Reliability-Based Optimization Considering Manufacturing and Operational Uncertainties, Robert H. Sues, Mark A. Cesare, Stephane S. Pageau and Justin Y.-T. Wu, AS Oct. 01, p166-174.

Mathematics
Probabilistic Methods for Aerospace Engineering, Sankaran Mahadevan, AS Oct. 01, p119.

Models
Quantification of Uncertainty in Structural Dynamic Models, Timothy Hasselman, AS Oct. 01, p158-165.

Review of Resistive Force Models for Earthmoving Processes, Stéphane Blouin, Ahmad Hemami and Mike Lipsett, AS July 01, p102-111.

Moon
Silicon PV Cell Production on the Moon, Michael B. Duke, Alex Ignatiev, Alex Freundlich, Sanders Rosenberg and Darby Makel, AS Apr. 01, p77-83.

NASA
Space Solar Power: A Major New Energy Option? John C. Mankins, AS Apr. 01, p38-45.

Space Solar Power: An Assessment of Challenges and Progress, John C. Mankins, AS Apr. 01, p46-51.

Space Solar Power: Environmental Questions and Future Studies, G. Pignolet, A. Celeste, M. Deckard and J. P. Esperet, AS Apr. 01, p72-76.

Technical Assessment of Space Solar Power Research Program, Jerry Grey, AS Apr. 01, p52-58.

Natural gas
Space Solar Power, Michael B. Duke, AS Apr. 01, p37.

Oils
Space Solar Power, Michael B. Duke, AS Apr. 01, p37.

Optimization
Reliability-Based Optimization Considering Manufacturing and Operational Uncertainties, Robert H. Sues, Mark A. Cesare, Stephane S. Pageau and Justin Y.-T. Wu, AS Oct. 01, p166-174.

Performance
Probabilistic Methods for Aerospace Engineering, Sankaran Mahadevan, AS Oct. 01, p119.

Performance evaluation
Contour Dust Shield Performance, Roberto A. Osegueda, Cesar J. Carrasco, Miguel Orozco, John Eftis, Edward Reynolds and Ted G. Sholar, AS Oct. 01, p147-157.

Photovoltaic effect
Silicon PV Cell Production on the Moon, Michael B. Duke, Alex Ignatiev, Alex Freundlich, Sanders Rosenberg and Darby Makel, AS Apr. 01, p77-83.

Plates
Buckling of Skew Plates with Continuity or Rotational Edge Restraint, P. Huyton and C. B. York, AS July 01, p92-101.

Power supplies
Space Solar Power: A Major New Energy Option? John C. Mankins, AS Apr. 01, p38-45.

Predictions
Mechanistic Model to Predict Statistical Scatter in Fatigue Response of Titanium Aluminide, Robert G. Tryon and Animesh Dey, AS Oct. 01, p120-126.

Probabilistic methods
Probabilistic Methods for Aerospace Engineering, Sankaran Mahadevan, AS Oct. 01, p119.

Propellants
Silicon PV Cell Production on the Moon, Michael B. Duke, Alex Ignatiev, Alex Freundlich, Sanders Rosenberg and Darby Makel, AS Apr. 01, p77-83.

Protective coatings
Contour Dust Shield Performance, Roberto A. Osegueda, Cesar J. Carrasco, Miguel Orozco, John Eftis, Edward Reynolds and Ted G. Sholar, AS Oct. 01, p147-157.

Qualifications
Quantification of Uncertainty in Structural Dynamic Models, Timothy Hasselman, AS Oct. 01, p158-165.

SUBJECT INDEX

Aerospace engineering
Probabilistic Methods for Aerospace Engineering, Sankaran Mahadevan, AS Oct. 01, p119.

Aerospace transport
Space Transfer-Vehicle Concept for Deploying Solar-Power Satellites, David W. Way and John R. Olds, AS Apr. 01, p65-71.

Aircraft
Stochastic Field Models for Aircraft Jet Engine Applications, Dan M. Ghiocel, AS Oct. 01, p127-139.

Mechanistic Model to Predict Statistical Scatter in Fatigue Response of Titanium Aluminide, Robert G. Tryon and Animesh Dey, AS Oct. 01, p120-126.

Assessments
Space Solar Power: An Assessment of Challenges and Progress, John C. Mankins, AS Apr. 01, p46-51.

Technical Assessment of Space Solar Power Research Program, Jerry Grey, AS Apr. 01, p52-58.

Axial compression
Elastic Buckling of Multilayered Anisotropic Conical Shells, Chih-Ping Wu and Chih-Wei Chen, AS Jan. 01, p29-36.

Influence of Fiber Undulations on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p12-20.

Influence of Residual Strains on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p21-28.

Bars
Circular Bars under Distributed Torques, James T. S. Wang, AS Jan. 01, p1-5.

Buckling
Buckling of Skew Plates with Continuity or Rotational Edge Restraint, P. Huyton and C. B. York, AS July 01, p92-101.

Elastic Buckling of Multilayered Anisotropic Conical Shells, Chih-Ping Wu and Chih-Wei Chen, AS Jan. 01, p29-36.

Influence of Fiber Undulations on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p12-20.

Influence of Residual Strains on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p21-28.

Cantilevers
Nonclassical Stability Problems: Instability of Slender Tubes under Pressure, Anthony N. Kounadis, AS Jan. 01, p6-11.

Composite materials
Design of Composite Surrogate Mirror Support Structure, Arup Maji, Brian Kozola and Steve Griffin, AS July 01, p112-118.

Composite structures
Design of Composite Surrogate Mirror Support Structure, Arup Maji, Brian Kozola and Steve Griffin, AS July 01, p112-118.

Reliability Analysis of Rotorcraft Composite Structures, S. Mahadevan, A. Dey, R. Tryon, Y. Wang and C. Rousseau, AS Oct. 01, p140-146.

Computer models
Mechanistic Model to Predict Statistical Scatter in Fatigue Response of Titanium Aluminide, Robert G. Tryon and Animesh Dey, AS Oct. 01, p120-126.

Conical bodies
Elastic Buckling of Multilayered Anisotropic Conical Shells, Chih-Ping Wu and Chih-Wei Chen, AS Jan. 01, p29-36.

Critical load
Nonclassical Stability Problems: Instability of Slender Tubes under Pressure, Anthony N. Kounadis, AS Jan. 01, p6-11.

Cylindrical shells
Influence of Fiber Undulations on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p12-20.

Influence of Residual Strains on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p21-28.

Damage
Contour Dust Shield Performance, Roberto A. Osegueda, Cesar J. Carrasco, Miguel Orozco, John Eftis, Edward Reynolds and Ted G. Sholar, AS Oct. 01, p147-157.

Dynamic stability
Nonclassical Stability Problems: Instability of Slender Tubes under Pressure, Anthony N. Kounadis, AS Jan. 01, p6-11.

Earthmoving
Review of Resistive Force Models for Earthmoving Processes, Stéphane Blouin, Ahmad Hemami and Mike Lipsett, AS July 01, p102-111.

Edge effect
Buckling of Skew Plates with Continuity or Rotational Edge Restraint, P. Huyton and C. B. York, AS July 01, p92-101.

Elastic deformation
Nonclassical Stability Problems: Instability of Slender Tubes under Pressure, Anthony N. Kounadis, AS Jan. 01, p6-11.

Elasticity
Elastic Buckling of Multilayered Anisotropic Conical Shells, Chih-Ping Wu and Chih-Wei Chen, AS Jan. 01, p29-36.

Electric power transmission
Space Solar Power: An Assessment of Challenges and Progress, John C. Mankins, AS Apr. 01, p46-51.

Space Solar Power: Environmental Questions and Future Studies, G. Pignolet, A. Celeste, M. Deckard and J. P. Esperet, AS Apr. 01, p72-76.

Technical Assessment of Space Solar Power Research Program, Jerry Grey, AS Apr. 01, p52-58.

Energy sources
Robotic Assembly of Space Solar Power Facilities, William Whittaker, Peter Staritz, Rob Ambrose, Brett Kennedy, Stephen Fredrickson, Joe Parrish and Chris Urmson, AS Apr. 01, p59-64.

Space Solar Power: An Assessment of Challenges and Progress, John C. Mankins, AS Apr. 01, p46-51.

Technical Assessment of Space Solar Power Research Program, Jerry Grey, AS Apr. 01, p52-58.

Engines
Stochastic Field Models for Aircraft Jet Engine Applications, Dan M. Ghiocel, AS Oct. 01, p127-139.

Environmental issues
Space Solar Power: Environmental Questions and Future Studies, G. Pignolet, A. Celeste, M. Deckard and J. P. Esperet, AS Apr. 01, p72-76.

Excavation
Review of Resistive Force Models for Earthmoving Processes, Stéphane Blouin, Ahmad Hemami and Mike Lipsett, AS July 01, p102-111.

Facilities
Robotic Assembly of Space Solar Power Facilities, William Whittaker, Peter Staritz, Rob Ambrose, Brett Kennedy, Stephen Fredrickson, Joe Parrish and Chris Urmson, AS Apr. 01, p59-64.

Fatigue
Mechanistic Model to Predict Statistical Scatter in Fatigue Response of Titanium Aluminide, Robert G. Tryon and Animesh Dey, AS Oct. 01, p120-126.

Reliability Analysis of Rotorcraft Composite Structures, S. Mahadevan, A. Dey, R. Tryon, Y. Wang and C. Rousseau, AS Oct. 01, p140-146.

Filament wound materials
Influence of Fiber Undulations on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p12-20.

Influence of Residual Strains on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p21-28.

Finite element method
Design of Composite Surrogate Mirror Support Structure, Arup Maji, Brian Kozola and Steve Griffin, AS July 01, p112-118.

Reliability Analysis of Rotorcraft Composite Structures, S. Mahadevan, A. Dey, R. Tryon, Y. Wang and C. Rousseau, AS Oct. 01, p140-146.

Manufacturing
Reliability-Based Optimization Considering Manufacturing and Operational Uncertainties, Robert H. Sues, Mark A. Cesare, Stephane S. Pageau and Justin Y.-T. Wu, AS Oct. 01, p166-174.

Mathematics
Probabilistic Methods for Aerospace Engineering, Sankaran Mahadevan, AS Oct. 01, p119.

Models
Quantification of Uncertainty in Structural Dynamic Models, Timothy Hasselman, AS Oct. 01, p158-165.

Review of Resistive Force Models for Earthmoving Processes, Stéphane Blouin, Ahmad Hemami and Mike Lipsett, AS July 01, p102-111.

Moon
Silicon PV Cell Production on the Moon, Michael B. Duke, Alex Ignatiev, Alex Freundlich, Sanders Rosenberg and Darby Makel, AS Apr. 01, p77-83.

NASA
Space Solar Power: A Major New Energy Option? John C. Mankins, AS Apr. 01, p38-45.

Space Solar Power: An Assessment of Challenges and Progress, John C. Mankins, AS Apr. 01, p46-51.

Space Solar Power: Environmental Questions and Future Studies, G. Pignolet, A. Celeste, M. Deckard and J. P. Esperet, AS Apr. 01, p72-76.

Technical Assessment of Space Solar Power Research Program, Jerry Grey, AS Apr. 01, p52-58.

Natural gas
Space Solar Power, Michael B. Duke, AS Apr. 01, p37.

Oils
Space Solar Power, Michael B. Duke, AS Apr. 01, p37.

Optimization
Reliability-Based Optimization Considering Manufacturing and Operational Uncertainties, Robert H. Sues, Mark A. Cesare, Stephane S. Pageau and Justin Y.-T. Wu, AS Oct. 01, p166-174.

Performance
Probabilistic Methods for Aerospace Engineering, Sankaran Mahadevan, AS Oct. 01, p119.

Performance evaluation
Contour Dust Shield Performance, Roberto A. Osegueda, Cesar J. Carrasco, Miguel Orozco, John Eftis, Edward Reynolds and Ted G. Sholar, AS Oct. 01, p147-157.

Photovoltaic effect
Silicon PV Cell Production on the Moon, Michael B. Duke, Alex Ignatiev, Alex Freundlich, Sanders Rosenberg and Darby Makel, AS Apr. 01, p77-83.

Plates
Buckling of Skew Plates with Continuity or Rotational Edge Restraint, P. Huyton and C. B. York, AS July 01, p92-101.

Power supplies
Space Solar Power: A Major New Energy Option? John C. Mankins, AS Apr. 01, p38-45.

Predictions
Mechanistic Model to Predict Statistical Scatter in Fatigue Response of Titanium Aluminide, Robert G. Tryon and Animesh Dey, AS Oct. 01, p120-126.

Probabilistic methods
Probabilistic Methods for Aerospace Engineering, Sankaran Mahadevan, AS Oct. 01, p119.

Propellants
Silicon PV Cell Production on the Moon, Michael B. Duke, Alex Ignatiev, Alex Freundlich, Sanders Rosenberg and Darby Makel, AS Apr. 01, p77-83.

Protective coatings
Contour Dust Shield Performance, Roberto A. Osegueda, Cesar J. Carrasco, Miguel Orozco, John Eftis, Edward Reynolds and Ted G. Sholar, AS Oct. 01, p147-157.

Qualifications
Quantification of Uncertainty in Structural Dynamic Models, Timothy Hasselman, AS Oct. 01, p158-165.

Reliability
Reliability-Based Optimization Considering Manufacturing and Operational Uncertainties, Robert H. Sues, Mark A. Cesare, Stephane S. Pageau and Justin Y.-T. Wu, AS Oct. 01, p166-174.
Stochastic Field Models for Aircraft Jet Engine Applications, Dan M. Ghiocel, AS Oct. 01, p127-139.

Reliability analysis
Reliability Analysis of Rotorcraft Composite Structures, S. Mahadevan, A. Dey, R. Tryon, Y. Wang and C. Rousseau, AS Oct. 01, p140-146.

Residual stress
Influence of Residual Strains on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p21-28.

Robotics
Robotic Assembly of Space Solar Power Facilities, William Whittaker, Peter Staritz, Rob Ambrose, Brett Kennedy, Stephen Fredrickson, Joe Parrish and Chris Urmson, AS Apr. 01, p59-64.

Rotary inertia
Reliability Analysis of Rotorcraft Composite Structures, S. Mahadevan, A. Dey, R. Tryon, Y. Wang and C. Rousseau, AS Oct. 01, p140-146.

Satellites
Space Solar Power, Michael B. Duke, AS Apr. 01, p37.
Space Transfer-Vehicle Concept for Deploying Solar-Power Satellites, David W. Way and John R. Olds, AS Apr. 01, p65-71.

Shear stress
Circular Bars under Distributed Torques, James T. S. Wang, AS Jan. 01, p1-5.

Shells
Elastic Buckling of Multilayered Anisotropic Conical Shells, Chih-Ping Wu and Chih-Wei Chen, AS Jan. 01, p29-36.

Skewness
Buckling of Skew Plates with Continuity or Rotational Edge Restraint, P. Huyton and C. B. York, AS July 01, p92-101.

Solar collectors
Space Solar Power, Michael B. Duke, AS Apr. 01, p37.
Space Solar Power: A Major New Energy Option? John C. Mankins, AS Apr. 01, p38-45.

Solar energy
Robotic Assembly of Space Solar Power Facilities, William Whittaker, Peter Staritz, Rob Ambrose, Brett Kennedy, Stephen Fredrickson, Joe Parrish and Chris Urmson, AS Apr. 01, p59-64.
Silicon PV Cell Production on the Moon, Michael B. Duke, Alex Ignatiev, Alex Freundlich, Sanders Rosenberg and Darby Makel, AS Apr. 01, p77-83.
Space Solar Power, Michael B. Duke, AS Apr. 01, p37.
Space Solar Power: A Major New Energy Option? John C. Mankins, AS Apr. 01, p38-45.
Space Solar Power: An Assessment of Challenges and Progress, John C. Mankins, AS Apr. 01, p46-51.
Space Solar Power: Environmental Questions and Future Studies, G. Pignolet, A. Celeste, M. Deckard and J. P. Esperet, AS Apr. 01, p72-76.
Space Transfer-Vehicle Concept for Deploying Solar-Power Satellites, David W. Way and John R. Olds, AS Apr. 01, p65-71.
Technical Assessment of Space Solar Power Research Program, Jerry Grey, AS Apr. 01, p52-58.

Space exploration
Robotic Assembly of Space Solar Power Facilities, William Whittaker, Peter Staritz, Rob Ambrose, Brett Kennedy, Stephen Fredrickson, Joe Parrish and Chris Urmson, AS Apr. 01, p59-64.
Silicon PV Cell Production on the Moon, Michael B. Duke, Alex Ignatiev, Alex Freundlich, Sanders Rosenberg and Darby Makel, AS Apr. 01, p77-83.
Space Solar Power: A Major New Energy Option? John C. Mankins, AS Apr. 01, p38-45.
Space Solar Power: An Assessment of Challenges and Progress, John C. Mankins, AS Apr. 01, p46-51.
Space Solar Power: Environmental Questions and Future Studies, G. Pignolet, A. Celeste, M. Deckard and J. P. Esperet, AS Apr. 01, p72-76.
Technical Assessment of Space Solar Power Research Program, Jerry Grey, AS Apr. 01, p52-58.

Space structures
Vibration and Damping in Three-Bar Tensegrity Structure, Irving J. Oppenheim and William O. Williams, AS July 01, p85-91.

Spacecraft
Contour Dust Shield Performance, Roberto A. Osegueda, Cesar J. Carrasco, Miguel Orozco, John Eftis, Edward Reynolds and Ted G. Sholar, AS Oct. 01, p147-157.

Stability criteria
Nonclassical Stability Problems: Instability of Slender Tubes under Pressure, Anthony N. Kounadis, AS Jan. 01, p6-11.

Statistics
Mechanistic Model to Predict Statistical Scatter in Fatigue Response of Titanium Aluminide, Robert G. Tryon and Animesh Dey, AS Oct. 01, p120-126.

Stiffness
Design of Composite Surrogate Mirror Support Structure, Arup Maji, Brian Kozola and Steve Griffin, AS July 01, p112-118.
Vibration and Damping in Three-Bar Tensegrity Structure, Irving J. Oppenheim and William O. Williams, AS July 01, p85-91.

Stochastic models
Stochastic Field Models for Aircraft Jet Engine Applications, Dan M. Ghiocel, AS Oct. 01, p127-139.

Stress distribution
Circular Bars under Distributed Torques, James T. S. Wang, AS Jan. 01, p1-5.

Structural design
Design of Composite Surrogate Mirror Support Structure, Arup Maji, Brian Kozola and Steve Griffin, AS July 01, p112-118.

Structural dynamics
Quantification of Uncertainty in Structural Dynamic Models, Timothy Hasselman, AS Oct. 01, p158-165.

Thin shell structures
Influence of Fiber Undulations on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p12-20.
Influence of Residual Strains on Buckling of Thin Filament-Wound Cylinders in Axial Compression, Suresh P. Pai and David W. Jensen, AS Jan. 01, p21-28.

Torsion
Circular Bars under Distributed Torques, James T. S. Wang, AS Jan. 01, p1-5.

Tubes
Nonclassical Stability Problems: Instability of Slender Tubes under Pressure, Anthony N. Kounadis, AS Jan. 01, p6-11.

Uncertainty analysis
Quantification of Uncertainty in Structural Dynamic Models, Timothy Hasselman, AS Oct. 01, p158-165.

Vehicles
Space Transfer-Vehicle Concept for Deploying Solar-Power Satellites, David W. Way and John R. Olds, AS Apr. 01, p65-71.

Vibration damping
Vibration and Damping in Three-Bar Tensegrity Structure, Irving J. Oppenheim and William O. Williams, AS July 01, p85-91.

Nonclassical Stability Problems: Instability of Slender Tubes under Pressure, AS Jan. 01, p6-11

Kozola, Brian
see Maji, Arup, AS July 01, p112-118

Lipsett, Mike
see Blouin, Stéphane, AS July 01, p102-111

Mahadevan, S.
Reliability Analysis of Rotorcraft Composite Structures, with A. Dey, R. Tryon, Y. Wang and C. Rousseau, AS Oct. 01, p140-146

Mahadevan, Sankaran
Probabilistic Methods for Aerospace Engineering, AS Oct. 01, p119

Maji, Arup
Design of Composite Surrogate Mirror Support Structure, with Brian Kozola and Steve Griffin, AS July 01, p112-118

Makel, Darby
see Duke, Michael B., AS Apr. 01, p77-83

Mankins, John C.
Space Solar Power: An Assessment of Challenges and Progress, AS Apr. 01, p46-51
Space Solar Power: A Major New Energy Option?, AS Apr. 01, p38-45

Olds, John R.
see Way, David W., AS Apr. 01, p65-71

Oppenheim, Irving J.
Vibration and Damping in Three-Bar Tensegrity Structure, with William O. Williams, AS July 01, p85-91

Orozco, Miguel
see Osegueda, Roberto A., AS Oct. 01, p147-157

Osegueda, Roberto A.
Contour Dust Shield Performance, with Cesar J. Carrasco, Miguel Orozco, John Eftis, Edward Reynolds and Ted G. Sholar, AS Oct. 01, p147-157

Pageau, Stephane S.
see Sues, Robert H., AS Oct. 01, p166-174

Pai, Suresh P.
Influence of Fiber Undulations on Buckling of Thin Filament-Wound Cylinders in Axial Compression, with David W. Jensen, AS Jan. 01, p12-20
Influence of Residual Strains on Buckling of Thin Filament-Wound Cylinders in Axial Compression, with David W. Jensen, AS Jan. 01, p21-28

Parrish, Joe
see Whittaker, William, AS Apr. 01, p59-64

Pignolet, G.
Space Solar Power: Environmental Questions and Future Studies, with A. Celeste, M. Deckard and J. P. Esperet, AS Apr. 01, p72-76

Reynolds, Edward
see Osegueda, Roberto A., AS Oct. 01, p147-157

Rosenberg, Sanders
see Duke, Michael B., AS Apr. 01, p77-83

Rousseau, C.
see Mahadevan, S., AS Oct. 01, p140-146

Sholar, Ted G.
see Osegueda, Roberto A., AS Oct. 01, p147-157

Staritz, Peter
see Whittaker, William, AS Apr. 01, p59-64

Sues, Robert H.
Reliability-Based Optimization Considering Manufacturing and Operational Uncertainties, with Mark A. Cesare, Stephane S. Pageau and Justin Y.-T. Wu, AS Oct. 01, p166-174

Tryon, R.
see Mahadevan, S., AS Oct. 01, p140-146

Tryon, Robert G.
Mechanistic Model to Predict Statistical Scatter in Fatigue Response of Titanium Aluminide, with Animesh Dey, AS Oct. 01, p120-126

Urmson, Chris
see Whittaker, William, AS Apr. 01, p59-64

Wang, James T. S.
Circular Bars under Distributed Torques, AS Jan. 01, p1-5

Wang, Y.
see Mahadevan, S., AS Oct. 01, p140-146

Way, David W.
Space Transfer-Vehicle Concept for Deploying Solar-Power Satellites, with John R. Olds, AS Apr. 01, p65-71

Whittaker, William
Robotic Assembly of Space Solar Power Facilities, with Peter Staritz, Rob Ambrose, Brett Kennedy, Stephen Fredrickson, Joe Parrish and Chris Urmson, AS Apr. 01, p59-64

Williams, William O.
see Oppenheim, Irving J., AS July 01, p85-91

Wu, Chih-Ping
Elastic Buckling of Multilayered Anisotropic Conical Shells, with Chih-Wei Chen, AS Jan. 01, p29-36

Wu, Justin Y.-T.
see Sues, Robert H., AS Oct. 01, p166-174

York, C. B.
see Huyton, P., AS July 01, p92-101
